Mira Showers

A KOHLER COMPANY

A KOHLER COMPANY

Choose a shower from the UK's No.1 Shower Brand

Welcome to Mira

You can depend on Mira. Based in Cheltenham, Gloucestershire, we've been leading the way in shower technology since 1937, when we launched the world's first ever thermostatic shower. Our expertise quickly established Mira as a household name.

Ever since those early days, our reputation has rested on our innovative design, quality engineering and attention to detail. We also provide an after sales service that's considered 'second to none'. When you choose a Mira shower, you know you're getting an excellent piece of craftsmanship from one of the UK's leading companies.

Getting in touch

If you have a question about our products or would like to talk to Mira Customer Services, please call us on 0844 571 5000. Alternatively you can email us at technical@mirashowers.com or visit our website: www.mirashowers.co.uk

If you'd like to find out where your nearest Mira Showers showroom is, or you'd like to order another brochure, please call us on 0844 571 0005 or visit our website: www.mirashowers.co.uk

Our history

We've always been a forward-thinking company

Established in 1921, here at Mira we've been leading the way in UK showering for decades. In 1937 we introduced the world's first ever thermostatic shower, designed to make showering safe in hospitals and schools.

Our mixer valves quickly became the standard for the shower market and in 1959 we unveiled the first thermostatic shower designed specifically for households in the UK. Mira mixers have remained firm favourites in the home ever since.

In 2001 Mira was acquired by the leading American bathroom and kitchen manufacturer Kohler Co, a family-run business. We still remain true to our founding principles of quality engineering and innovative design.

Despite all our successes we don't believe in standing still. Our groundbreaking Research and Development teams are constantly introducing new innovations and improvements to make showering even more of a pleasure. The high standards we uphold means that our products are sought after worldwide and are now available in over 40 countries.

If you're looking for a shower you can really enjoy, choose one with a real history of excellence behind it.

Looking to the future

We may be the UK's leading shower manufacturer, but we're not ever going to rest on our laurels. We invest heavily in research and development to make sure our showers are always at the leading edge of design and technology.

Our shower Research and Development lab is one of the biggest in the UK, with over 100 engineers and technicians constantly working on new products. So when you choose Mira you know lots of care and attention to detail has gone into making sure everything works perfectly.

Test and test again

Our excellent reputation is very important to us. That's why we put every single shower through a set of rigorous tests before it even leaves the factory. We also pressure test every model along the assembly line to make sure there are no leaks. And we check everything against its product specification.

What does all this mean to you? Well, whether you're choosing a powerful digital shower or simply just a soap dish, if it's got the word 'Mira' on it you know it's designed to the most exacting standards.

We make things easy for you

There's lots of complex technology inside even the simplest shower. But we design every Mira to be easy to choose, easy to use and easy to fit. We worry about the technical bit so you don't have to. Simply relax and enjoy the exhilarating showering experience of standing under a Mira shower.

Saving water and caring for the environment

At Mira we do all we can to make sure we're environmentally friendly. And our technology helps you do your bit too.

You probably already know that taking a quick shower rather than having a bath helps to save water. But did you know you can do even more for the environment thanks to water-efficient products from Mira?

Our Eco Showerhead uses what's called aeration technology to mix water with tiny air bubbles, making the spray feel wet while using up to 75% less water than a standard showerhead. And don't worry about it being a hassle to fit. All you have to do is unscrew your existing showerhead and replace it with an Eco.

Your choice of shower can also help save water. Our Minilite Eco delivers 6 or 8 litres of water a minute, rather than the normal 12. So over the year you could save thousands of litres of water, without noticing any difference to your showers. Or choose a Mira Miniduo with an Eco showerhead and you'll cut the water you use by up to 75%.

It's official – our showers save water

As the leading trade association for bathroom manufacturers in the UK, the BMA has introduced the Water Efficient Product Labelling Scheme to highlight showers that save water and energy. We're pleased to say most of our showers – including all our electric range – meet the scheme's criteria. So if you'd like to do your bit for the environment, without noticing any difference in the performance of your shower, choose a shower with the label on the right.

Some of our showers have also been awarded the Waterwise Marque. Waterwise is the leading authority on water efficiency in the UK. Every year they award their Marque to products that cut back on wasted water. As you can see in this brochure, our Eco Showerhead, Mira Minilite Eco mixer and Mira Miniduo with Eco Showerhead have all been awarded the Waterwise Marque.

If you want to save water, choose a Waterwise approved shower:

Mira Minilite Eco mixer	20
Mira Miniduo with Eco Showerhead	22
Mira Eco Showerhead	108

How to choose your perfect shower

Each of our showers is designed to bring you an exhilarating flow and beautiful design. But which is right for you? This brochure helps make your decision easier. Just follow the three simple steps:

STEP 1

Page 8-9

What kind of water system do you have?

Some showers can only work with certain types of water system. So you need to work out what system you have. Pages 8-9 show you the main types of water system in the UK and help you find out which is the one in your home.

STEP 2

Page 10-11

What type of shower do you need?

Once you know what type of water system you have you need to think about which type of shower you'd prefer. You can choose from digital, mixer, electric or power showers. Each one has its own benefits. You can find out more on pages 10-11.

STEP 3

Page 12

Make your choice with our simple 'Shower Selector'

You know the water system you have. You know what type of shower you'd like. Now use our simple flow chart on page 12 to make your final decision.

MORE HELP

If you'd like to know anything more

- Still not sure which shower is right for you? Feel free to call our customer services team on **0844 571 5000**.
- Alternatively, if someone is installing a shower for you, why not ask them for help? They'll know what water system you have, and will be able to make suggestions.
- If you're fitting your shower yourself, or you'd just like more detailed information about a particular shower, you can find our Installation and User Guides online. Just visit **www.mirashowers.co.uk/support/installationguide.htm**.

Approval Marques

WRAS — Assesses products for compliance with regulation 4 of the Water Supply (Water Fittings) Regulations 1999.

BEAB Approved — Awarded by the BEAB to products which have been evaluated against the highest European and International standards.

BEAB Care — Awarded by the BEAB to products which have been additionally tested on performance relating to application in the care sector.

Developed by the BMA to raise awareness of bathroom products that when installed and used correctly use less water and save energy.

Waterwise is the leading authority on water efficiency in the UK. Every year they award their Marque to products that cut back on wasted water.

RNIB supporting blind and partially sighted people — Shows that the product has been endorsed by the Royal National Institute of Blind People (RNIB).

Certifies Type 2 thermostatic mixing valves for the domestic market to promote the safe use of hot water, with the immediate focus on social housing.

STEP 1

What kind of water system do you have?

Some of our showers only work with certain types of water system. So before you choose your ideal shower you'll need to find out what system you have. These two pages show you the most common types of water system in the UK.

If you're not sure which type you have, just ask a qualified shower installer. Alternatively you can call us on **0844 571 5000** or visit **www.mirashowers.co.uk/watersystems**.

At a glance

As you're looking through this brochure, you can see exactly which systems each of our showers works on by checking the simple icon on each page:

All systems Compatible with all systems.

High pressure Mains pressure combination boiler. Mains pressure unvented. Low pressure gravity with pump.

Low pressure Low pressure gravity system.

Cold mains Cold mains supply only.

Low pressure gravity system

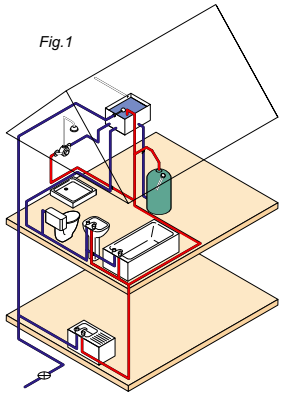
See Fig.1

This is the most common type of system. There's normally a cold water tank or cistern in your loft and a hot water cylinder in your airing cupboard. The water is kept under pressure via the gravity-fed water delivered from the cistern.

We recommend:

- Mixer showers, pumped digital mixer showers and all-in-one power showers.
- If you'd like a mixer shower, fitting a shower pump will give you an even stronger flow (see page 14).

Fig.1



High pressure – mains pressure combination boiler

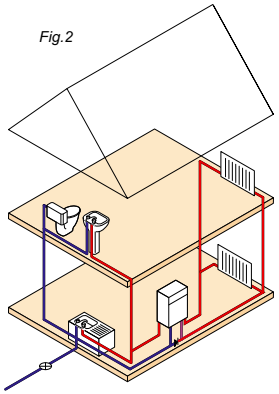
See Fig.2

A combination boiler heats cold water directly from the cold mains supply as soon as you turn on a shower or hot tap. Typically, the boiler is the size of a small kitchen cupboard and can be fitted anywhere in the home. You won't have a cold water tank in your loft or a hot water tank in your airing cupboard.

We recommend:

- Digital mixer showers and mixer showers – both of which will give you a powerful flow.
- If water efficiency is important to you, then you could choose one of our eco mixer showers, or fit an electric shower to the cold mains supply. This is an energy saving option if you want a second shower or an en-suite perhaps.

Fig.2



High pressure – mains pressure unvented

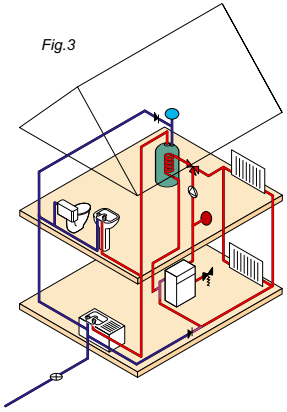
See Fig.3

There's normally a hot water cylinder in your airing cupboard, but there's unlikely to be a cold water tank or cistern in your loft. The tank stores mains pressure hot water, and this is heated in a number of different ways such as immersion heaters, central heating boilers or even solar water panels. There are other types of systems like this that give you hot water at mains pressure – they're known as 'thermal store systems'.

We recommend:

- Digital mixer showers and mixer showers – both of which will give you a powerful flow.
- If water efficiency is important to you, then you could choose one of our eco mixer showers, or fit an electric shower to the cold mains supply. This is an energy saving option if you want a second shower or an en-suite perhaps.

Fig.3



Cold mains supply

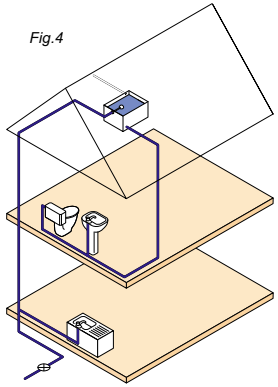
See Fig.4

If you don't have stored hot water, or don't want to use it all up when running a shower, then you can fit an electric shower directly to the cold mains supply. This heats the water for you and gives you hot water as soon as you turn it on. The higher the kilowatt rating of an electric shower, the stronger the flow it gives you.

We recommend:

- Any electric shower.
- If your mains water doesn't give you enough pressure, the Mira Elite ST is a pumped electric shower that you can fit to your stored cold water tank or cistern.

Fig.4



STEP 2

What type of shower do you need?

Now you know what water system you have, this section shows you the benefits of each type of shower. So you can begin to pinpoint exactly what you're looking for.

If you're replacing a shower and you don't want to re-tile, it's worth checking the position of the hot and cold water pipes, and the shape and size of the replacement shower. That way you'll be sure that the new shower fits over the old screw holes and onto the pipework. To make life easier, some of our mixer showers have adjustability on the inlet pipe centres.

Mixer showers

Mixer showers take water from both your hot and cold water supplies and mix it to create your ideal temperature.

- If you have a high pressure system, a mixer shower will give you a powerful flow, if selected.
- With low pressure systems, you can make the flow more forceful by adding a Mira Enduro pump.
- We offer a range of different styles of mixers, including contemporary designs, classic looks and mini sized versions.
- You also have a choice of temperature control – manual, pressure balancing or thermostatic. You can find out more on page 14.
- Most of our mixers work on all water systems, and are ideal for any home with a suitable supply of hot water.

Digital mixer showers

Like mixer showers, digital mixers take water from your hot and cold supplies and mix it to create your ideal temperature. The digital technology ensures you enjoy the exact temperature you want, every single time.

- Digital thermostatic technology stabilises the temperature, and gives you a range of additional features such as warm up, time out and lock off.
- Digital showers are very easy to install – you won't need to channel out your walls or mess up your tiling.
- The slim mixer unit can be mounted away from the shower – in an area which has easy access for servicing, such as the loft or under some baths – reducing the amount of pipework required.

Electric showers

Electric showers work like a kettle, taking water from your cold water supply and warming it by passing it safely over heating elements contained in the shower unit.

- They'll work even if your boiler fails, as long as your electric supply is working.
- With an electric shower, you won't use any of your stored hot water. So if you have a limited supply of hot water, or you want to use it for something else, an electric shower is the perfect solution.
- If your mains water doesn't give you enough pressure, the Mira Elite ST is a pumped electric shower that can fit to your stored cold water tank.
- All of our electric showers have been approved as Water Efficient by the Bathroom Manufacturers' Association because they use less water.

Check your cabling

If you're replacing an existing electric shower your installer will need to ensure that the installation complies with the latest wiring regulations.

Power showers

Power showers take water from the stored hot and cold water supplies and mix it together to create your ideal temperature. All-in-one power showers, like the one pictured on the right, have an in-built pump which boosts the flow of water to give a truly exhilarating shower.

- If your house has a high pressure water system you won't need a power shower – you can enjoy a powerful flow simply by installing a mixer shower or digital mixer shower.
- If you have a low pressure system you don't have to fit an all-in-one power shower. You can choose a mixer shower and fit a separate shower pump instead or pumped digital mixer shower.
- Power showers are ideal if your household has plenty of hot water.

Eco showers

If you'd like to save water when you shower, our range of eco showers use flow regulators to limit the maximum flow of water, and our Mira Eco showerhead uses aerating technology to create the sensation of a normal, drenching flow while using a lot less water

- To save water, look for showers with the BMA Water Efficiency logo and the Waterwise Marque.

MORE HELP

We're here if you need a helping hand

If you're not sure what water system you have, or you'd like to know anything more about Mira, you'll find plenty of helpful advice at our website, **www.mirashowers.co.uk**.

- Use our online tools to identify your water system or choose your ideal shower.
- Compare the benefits of our showers by using our 'compare and select' feature.
- Check out the most frequently asked questions about showers.
- Watch our handy installation videos.

www.mirashowers.co.uk

You can also view or download our installation and user guides for all our products, as well as a technical brochure.

If you'd rather talk to someone at Mira directly, feel free to call us on **0844 571 5000**. One of our friendly assistants can help you choose the best shower for you.

0844 571 5000

Introduction Contemporary Mixer Showers

For a sleek, clean and modern look in your bathroom, choose a mixer from our contemporary range. You'll enjoy a great performance and consistent flow, and add a touch of modern designer style.

Mixers take water from your hot and cold supplies then mix it to create your perfect temperature. They're ideal if you have lots of hot water on tap. If you have a high pressure system, a mixer shower should give you a more powerful flow than an electric one. On the other hand, if you have a low pressure system, you can boost the flow by adding a Mira shower pump (see below).

To find out what water system you have, turn to page 8. Most Mira mixers work on all the common UK water systems, but it's important to check before installation.

Which temperature control?

Mixer showers have 3 different types of temperature control:

Manual – Your shower will not compensate for changes in the incoming supply temperature or pressure and the shower temperature may change.

Pressure Balancing – if you have a pressure balancing mixer, it will compensate for any change in water pressure and give you a constant showering temperature, provided the supply temperature remains constant.

Thermostatic – a thermostat constantly monitors the incoming water temperature and makes adjustments to keep the temperature constant. Thermostatic controls give you great temperature control and are ideal for people who are at risk such as the very young or elderly.

mini size
maximum
performance

Pressed for space?

If space is an issue in your bathroom, look out for our 'Mini' symbol on the left. This highlights our range of 'Mini' showers, which bring you the powerful performance of a mixer but with smaller valves.

Low pressure water system?

A Mira Enduro Shower Pump is compatible with most showers, and helps to boost the water flow to create a stronger and more invigorating spray.

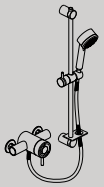
Overview Contemporary Mixer Showers

We've got a wide range of designs to choose from. Some of these designs are available in different configurations - EV, BIR, BIV, ER and ERD, so you can choose the style and configuration to suit you.

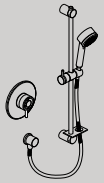
mini size **maximum** performance

This is our range of 'Mini' showers, they still offer the same powerful performance as our other mixer showers but with smaller valves.

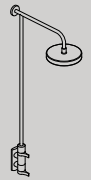


EV Exposed Variable
The shower control is mounted on the wall. Your shower comes with a showerhead, hose, clamp bracket and slide bar. Some models also come with a soap dish.

BIR Built-In Rigid
The controls and showerhead are both built in to the wall. There's no hose or slide bar, so your shower has a minimalist look.



BIV Built-In Variable
The shower control is built into the wall for a smart, clean finish. The shower comes with a showerhead, hose, right-angled hose connector, clamp bracket and slide bar. Some models have a soap dish too.



ER Exposed Rigid
The shower control and showerhead are both mounted on the wall on a single riser bar.

ERD Exposed Rigid with Diverter
The shower control and showerhead are both mounted on the wall on a single riser bar. The shower also has a second adjustable showerhead.

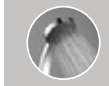
Mini size, maximum performance. Beautifully compact, but with a powerful punch, the thermostatic technology and simple to use single controls on the Mira Minilite range make it ideal for all the family.

All systems*

3 Year guarantee

1 Spray pattern

Thermostatic



Start

choose from the following configurations:

Mira Minilite EV
exposed valve with adjustable fittings, chrome finish
£204.70 inc VAT RRP

Mira Minilite EV Eco*
exposed valve with adjustable fittings and 6L flow regulator, chrome finish
£204.70 inc VAT RRP

Mira Minilite BIV
built-in valve with adjustable fittings, chrome finish
£216.20 inc VAT RRP

Mira Minilite BIV Eco*
built-in valve with adjustable fittings and 6L flow regulator, chrome finish
£216.20 inc VAT RRP

product features:

- Thermostatic temperature stability keeps showering safe for all the family
- One single control for flow and temperature creates a clean, minimal look
- Single-spray showerhead with rub-clean rubber nozzles makes cleaning easy
- Minilite Eco EV and BIV are approved by the BMA and Waterwise as water-efficient products – saving up to 50% water compared to the standard Minilite
- EV models come with 110mm pipe centres. If your existing pipework is between 133-153mm you can buy an optional extended elbows pack
- Can be fitted to falling, rising and rear water supplies
- Approved to TMV2 standards, which means you know its thermostatic control is the very highest quality**
- All models come with a clean chrome finish

* Our Eco showers only work on systems with at least 0.5 bar pressure.

** Our Eco showers are not TMV2 approved because of the flow regulator.

Introduction Classic Mixer Showers

If you're looking to create a traditional look in your bathroom and you want the very best, dependable technology to go with it, a classic Mira mixer could be exactly what you need. Elegant lines, sleek chrome finish, and an invigorating flow every time – it's no wonder Mira leads the way in mixers.

Mixers work by taking water from your cold and your hot water supplies and mixing it together to create your perfect temperature. If you've got a suitable supply of water in your home, a mixer could be ideal.

Thermostatic control for safer showering

Every mixer in our classic range comes with thermostatic control, which constantly measures the incoming water temperature and makes adjustments to keep the showering temperature consistent. Thermostatic control gives you great great temperature control and is ideal for those at risk, which is great to know if you have youngsters or elderly people in your house.

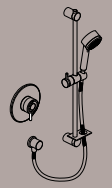
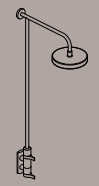
Overview Classic Mixer Showers

We've got a range of classic designs to choose from. Some are available in different configurations – BIR, BIV, ER and ERD – so you can choose the style and configuration to suit you. If you would like more information on any of our classic mixer range please call us on **0844 571 5000** or visit **www.mirashowers.co.uk.**

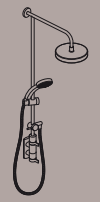
BIR Built-In Rigid
The controls and showerhead are both built in to the wall. There's no hose or slide bar, so your shower has a minimalist look.



BIV Built-In Variable
The shower control is built into the wall for a smart, clean finish. The shower comes with a showerhead, hose, right-angled hose connector, clamp bracket and slide bar. Some models have a soap dish too.



ER Exposed Rigid
The shower control and showerhead are both mounted on the wall on a single riser bar.



ERD Exposed Rigid with Diverter
The shower control and showerhead are both mounted on the wall on a single riser bar. The shower also has a second adjustable showerhead.

Introduction Digital Mixer Showers

Digital showers are similar to mixer showers as they take water from both your hot and cold water supplies and then mix it to give you your ideal temperature. But there's one crucial difference. They have a separate mixer unit and shower controls so you can mount the slim mixer unit away from the shower in an area which has easy access for servicing, such as a loft or even under some baths. This reduces the amount of pipework needed to install the shower, and means the shower controls takes up less space in your shower area.

Our digital showers also come with a range of additional features:

- A special lock-off so you can prevent the shower being used
- A warm-up feature, which gently heats the water to your ideal temperature, then switches the flow off until you're ready to get in
- A timing feature, so you can set your precise showering time, saving energy and water

How to buy your digital shower

You can buy your digital shower and control unit as separate items, for the ultimate in flexibility.

Step 1

Choose the digital mixer valve that suits your water system

If you want to go digital with your shower, you'll need to buy a digital mixer unit. This is the intelligent control unit that mixes the water and supplies it to the shower control. It can be fitted away from your actual shower. You can either choose a high pressure valve, or a pumped digital mixer valve for low pressure, gravity fed systems.

Step 2

Choose your shower controls

If you'd like a minimalist look, we suggest a Mira Magna UV or BIV. Alternatively you might be looking for a larger showerhead, in which case we recommend a Mira Magna Waterveil. You can even choose a digital shower control that fills your bath too. Make your selection from pages 62-63.

Mira Magna UV

Mira Magna BIR

Step 3

Decide whether you want remote control

All of our digital mixers are available with or without a remote control, for the ultimate in convenience.

Mira Magna	64
Mira Magna Waterveil	66
Mira Magna Bath Shower Mixer 1 Control	68
Mira Magna Bath Shower Mixer 2 Control	70

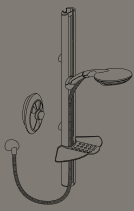
Overview Digital Mixer showers

We've got a range of stylish digital shower controls to choose from, including BIR, UV, Bracket, Bar and bath fill options. Whichever design you choose, remember that you'll need a digital mixer unit to make it work. If you would like more information on any of our digital mixer range please call us on **0844 571 5000** or visit **www.mirashowers.co.uk.**

BIR – Built-In Rigid
The controls and the showerhead are both built in to the wall. No hose or slide bar, it gives you a stylish minimalist look.

UV Universal
Universal fittings are exclusive to the Mira Magna range and allow connection either through the ceiling or through the wall. They come with a showerhead, as well as a slide bar and clamp bracket.

Waterveil Bracket
The shower control is mounted on the wall, and your shower comes with a 17cm Waterveil showerhead, showerhead wall bracket, hose, right-angled hose connector and soap dish.



Waterveil Bar
The shower control is mounted on the wall, and your shower comes with a 17cm Waterveil showerhead, showerhead bracket, hose, right-angled hose connector, slide bar and soap dish.

Introduction Electric Showers

Electric showers only take water from your mains cold water supply, so the chances are an electric shower would suit your home. They heat the water when you turn the shower on, passing it over a heating element inside the shower. It's similar to how a kettle works.

One reason to choose an electric shower is that it won't use up any of your stored hot water. So if you have a limited supply of stored hot water, or you want to use it for something else like a bath perhaps, an electric shower really makes sense. It's also ready to use any time of day or night.

Which temperature control?

Electric showers can come with 4 different types of temperature control. Choose which you prefer – you can check which shower has which controls on the following pages.

Pressure stabilised – these showers contains a device which stabilises your selected showering temperature by controlling the flow rate to accommodate changes in the incoming water pressure.

Advanced Pressure stabilised – these showers control your showering temperature in a similar way to pressure stabilised models, but they also feature Opti-Flo™ technology which gives you a wider selectable flow rate range. This means you can enjoy the full power of the shower even in the summer months when the incoming water temperature is higher. You'll also benefit from Sensi-Flo™ and Clearscale™ technology. Clearscale™ incorporates DualElement™, phased shutdown and rub-clean nozzles which work together to reduce limescale by up to 50%.

Thermostatic – a thermostat in the shower constantly monitors the showering temperature and stabilises it to within +/- 2°C* by controlling the flow rate to accommodate changes in the incoming water pressure, incoming water temperature and supply voltage. Thermostatic showers are great if you want close temperature control, or if you have very young or elderly family members in your home. Thermostatic showers also feature Clearscale™ technology, incorporating DualElement™, phased shutdown and rub-clean nozzles which work together to reduce limescale by up to 50%.

Advanced Thermostatic – the ultimate in temperature control. These showers control the temperature in the same way as thermostatic showers, but because they use electronic technology your shower temperature will be consistent to within +/- 1 C*. All the showers in our Mira Advance ATL range have been awarded the BEAB Care Marque, which makes them ideal for the healthcare sector.

*Within product specifications

Water-saving showers

All our electric showers meet the strict criteria set out by the Bathroom Manufacturers' Association (BMA) for using water efficiently. So whenever you see a shower with this logo you know it'll help you save water.

Overview Electric Showers

We've got a wide range of electric showers to choose from, which are available in different kilowatt power ratings. Look for a higher kilowatt rating if you want a more powerful flow. All of our electric showers are approved by the BMA as being Water Efficient. If you would like more information on any of our electric range please call us on **0844 571 5000** or **visit www.mirashowers.co.uk.**

electric shower, white/chrome finish
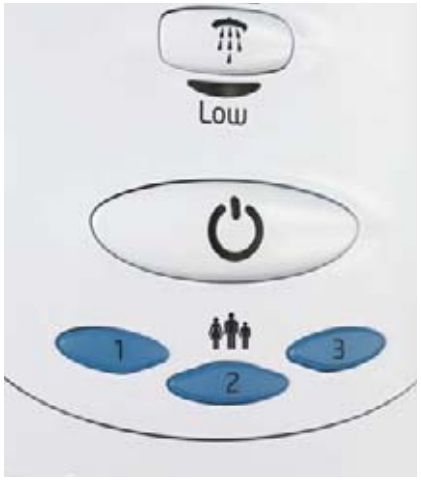
9.0kW £448.50 inc VAT RRP
9.8kW £489.90 inc VAT RRP

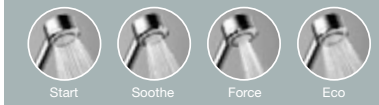


product features:

- Advanced thermostatic temperature stability keeps showering safe for all the family
- Separate controls for flow and temperature, as well as an on/off push button that bleeps to let users know it's on
- The Adjustable Temperature Limit gives you the option of selecting your preferred maximum temperature from 8 different settings - ideal if you have people at risk in the home
- Microchip technology means temperature always stays within +/- 1°C, bringing you the best control on the market
- 4-spray showerhead with partial rub-clean rubber nozzles makes cleaning easy
- The smooth slide bar is easy to use, and the friction clamp bracket means people can adjust it with just one hand – and you can have it either wall or corner mounted too
- With tactile raised areas, a large on/off button, an backlit buttons and an audible click on the temperature lever, it's designed to be easy for everyone
- It's the best shower in its class for stopping limescale build up
- The softened shape creates a pleasant look
- A delayed shutdown flushes hot water from the tank to make it safe for the next user and keep limescale down
- Comes in 9.0kW and 9.8kW power options, so there's bound to be one to suit your home
- All models come with a stylish white/chrome finish

Mira Galena

Pure, minimal looks, gorgeously tactile features, Galena's textured fascia creates the look and feel of natural slate. While thermostatic technology ensures performance and user safety.



Mira Galena
electric shower, slate effect finish
9.8kW £547.40 inc VAT RRP

product features:

- Thermostatic temperature stability keeps showering safe for all the family
- Separate controls for power and temperature/flow as well as a simple push button to turn it on and off make it easy to use
- SMA technology™ means temperature always stays within +/- 2ºC
- 4-spray showerhead with full rub-clean rubber nozzles makes cleaning easy
- Our Sensi-flo™ technology switches off the heat if the flow's blocked – making it totally safe
- Clearscale™ cuts limescale by half so the shower performs better and lasts longer
- Available in a 9.8kW power rating
- The textured fascia has the look and feel of natural slate

Introduction Power Showers

Nothing beats the exhilaration of standing under a truly drenching flow of cleansing water. Power showers from Mira come with an internal pump to boost the flow and give you a shower that delivers a stunning cascade every single time.

Power showers mix water from both your hot and cold supplies to give you your ideal temperature. If you've got a plentiful supply of hot water in your home, a power shower could be ideal.

If you'd like a powerful flow but would prefer a mixer shower, you can install a separate shower pump – see page 14 to find out more.

Which temperature control?

There are 2 different types of temperature control available with power showers. Simply choose the one that you'd be happiest with – you can see which shower comes with which type of control over the following pages.

Manual – Your shower will not compensate for changes in the incoming supply temperature or pressure and the shower temperature may change.

Thermostatic – give you great temperature control and are ideal for people who are at risk such as the very young or elderly.

Overview Power Showers

We've got a stylish range of all-in-one power showers to choose from. These types of showers have a built-in pump which boosts the flow rate. You can achieve similar flow rates by fitting a shower pump to one of our contemporary or classic mixers. If you would like more information on any of our power shower range please call us on **0844 571 5000** or visit **www.mirashowers.co.uk.**

Introduction Parts & Accessories

Perhaps you want to give your bathroom a makeover, or you'd simply like to replace an old shower part. At Mira we offer a wide range of accessories that are easy and simple to fit. From showerheads that use less water to stylish soap dishes, you'll find whatever you're looking for here. Most of our range will fit other makes and models of shower. So even if you're not lucky enough to currently own a Mira, you can still refresh your shower.

Experience the very latest in showering technology

Our design teams are constantly developing new and innovative showerheads to bring you an even better showering experience:

- Pictured on the right, the Mira 360 is a brand new type of showerhead that literally turns showering on its head, bringing you a simple flip action to create four unique and invigorating sprays.
- Mira Eco is a water-saving showerhead that can help you save up to 75%* of the water you use when you shower, without noticing any difference to the flow.
- Mira Everclear is specially designed to stop limescale building up, so your showerhead gives a consistent flow and has a longer life.

Buy accessories direct from Mira

If you live in the UK, you can now purchase your shower fittings or accessories direct from Mira, at recommended retail prices (RRP). To place an order please visit our website **www.mirashowers-store.co.uk** or call us on **0844 571 5000** (UK only Monday - Friday 8.00am - 5.30pm and Saturday 8.30am - 3.30pm).

*When compared to a Mira Logic showerhead at 0.5 bar pressure. Mira Eco is not suitable for electric showers or gravity fed systems under 0.5 bar pressure.

Co-ordinating fittings kit

Mira Logic Fittings Kit
The Mira Eco adjustable showerhead can be used with your existing hose and fittings. If you'd prefer to update all of your fittings, the Mira Eco fittings kit is the perfect solution. Choose from a 1.25m or 1.75 m hose:

1.25m hose £73.40 inc VAT RRP
1.75m hose £76.34 inc VAT RRP

Saving water by 75%*

Saving water is good news for the environment and for your utility bills too. Choose an Eco showerhead and you'll know you're using water as efficiently as possible, thanks to our groundbreaking technology. By delivering larger water droplets filled with air, Eco creates a great showering sensation, while actually cutting the amount of water used by up to 75%*. So you don't have to compromise on that exhilarating Mira feeling to do your bit for the environment.

Fitting an Eco showerhead to your shower means you'll also save on the fuel bills, as there's less water to heat. Not only that, Eco also comes with special 'wipe-clean' nozzles to keep limescale at bay.

Save water whatever your flow

Our water-saving technology works across all 3 of Eco's spray patterns. So whether you prefer a gentle spray or a concentrated flow, you're still saving water and heating costs.

* When compared to a Mira Logic showerhead at 0.5 bar pressure.
** Mira Eco is not suitable for electric showers or gravity fed systems under 0.5 bar pressure.

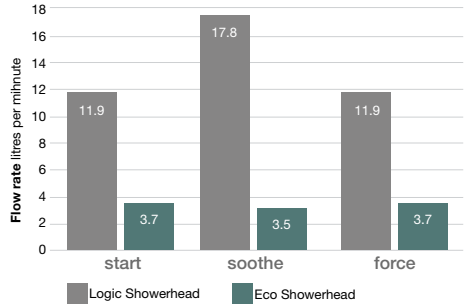
Mira Eco Showerhead

Mira Logic Showerhead

waterwise
AWARD WINNING WATER SAVER

Mira Eco has been awarded the Waterwise Marque. Waterwise is the leading authority on water efficiency in the UK and each year they award the Marque to products which reduce water wastage or raise awareness of water efficiency.

Flow rates at 0.5 bar
Logic showerhead vs. Eco showerhead



The Mira Eco showerhead uses on average 10.2 litres per minute less than the Mira Logic showerhead.

Mira Everclear

The Mira Everclear showerhead fights limescale. Its unique design resists limescale build up with automatic self drain and integrated pins for easy cleaning of the nozzles.

Self cleaning technology

Over 60% of the population is affected by hard water. Often, this can result in limescale build up, which doesn't just leave ugly marks on your shower, it can also clog up the nozzles which restricts the spray. Mira Everclear features innovative technology which means the showerhead drains automatically before any limescale has time to build up.

When showering begins, the spray plate automatically pushes forward giving a comfortable wide spray. Turning off the water will automatically allow the spray plate to retract to the rest position. The showerhead drains away any residual water and small pins come through the spray plate to ensure it is cleared thoroughly, reducing any limescale build up. The spray plate can also be manually pressed for an extra clean if necessary.

Ideal for mixer showers

We designed Mira Everclear to be simple to fit. It's suitable for most mixer showers over 0.2 bar pressure, and electric showers over 9.0kW. We've got a range of finishes and models to choose from, so you can find the showerhead or fittings kit that matches your existing shower perfectly.

* Suitable for most mixers over 0.2 bar pressure and electric showers over 9.0kW.

The spray plate automatically pushes through small pins to prevent limescale build up. It can also be manually pressed for an extra clean if necessary.

Mira 360

Introducing the new Mira 360. A brand new range of shower fittings that is literally turning showering on its head. The Mira 360 comes complete with Flipstream™ technology - 1 flip action, 4 unique sprays. You choose the spray by rotating the showerhead on its axis. So whatever your mood, there's a spray for you.

Introduction Taps & Bath Shower Mixers

Whether you're looking for a new shower or fitting a whole new bathroom, you want everything to work perfectly and look good too. With Mira, you can choose from a huge range of precision-engineered taps and mixer taps to create a coordinated and stylish look. Our best-selling showers come with their own range of matching taps, specially designed to complement their aesthetics. Or you can choose to mix and match with taps from any one of our brassware ranges. Most of our taps come in a range of configurations, including styles and sizes designed for basins, baths and bidets. Many also let you choose between separate hot and cold taps or single lever 'monobloc'.

Monobloc

Taps that deliver hot and cold water in one flow. We also have a range of monobloc taps for the bath that can be mounted on a wall or directly onto the bath. Any combination is possible, so whatever look you want to create, we can help you achieve it.

Mira Excel	122
Mira Discovery	123

Overview Taps & Bath Shower Mixers

Our taps have been designed to match perfectly with the Mira Excel and Mira Discovery mixer showers, but they will also look great with most of our contemporary range. We've also got a selection of bath shower mixers which combine bath fill and an invigorating shower in one simple to use control. If you would like more information on our taps and bath shower mixers please call us on **0844 571 5000** or visit **www.mirashowers.co.uk.**

We’re here to help
Get in touch whenever you need us

If you’re thinking about buying a Mira shower, or you already have a Mira but need a bit of help or advice, we’re just a phone call away. Perhaps you need help working out what water system you have. Or you might need a spare part or want us to arrange a visit from a service engineer. The good news is that when you buy a Mira, you can count on our dedicated Customer Services Team to provide lifetime support for your product.

How to get help over the phone

It goes without saying that you’d prefer to talk to a friendly human being rather than working through an automated system or listening to tedious hold music. That’s why we answer 85% of all calls within 15 seconds. All our Customer Service representatives have been fully trained in Mira products, and do at least 150 hours of training every year. We make sure they know every Mira product inside out, so they’ll be able to help whatever question you have.

If you’d like to get in touch with us over the phone, feel free to call on **0844 571 5000**.

We take service seriously

We know our excellent reputation depends on the service we provide. That’s why we’re always working to make our service second to none. It’s also why we’re the only shower manufacturer that’s a member of the Institute of Customer Service, the professional body for after-sales support and service.

Corporate Member
Institute of Customer Service

The Institute of Customer Service is the professional body for customer service, whose primary purpose is to lead customer service performance and professionalism. We have a strong commitment to continuous improvement of customer service, and we’re the only shower manufacturer with membership to the ICS.

Help after you've bought a Mira

How to arrange a visit from a Mira engineer

If you ever need hands-on help with your Mira, we can send an engineer out to you. Even if your warranty has expired, you can still call on us. We only charge by the visit and not by the hour, so you know you're getting good value for money.

- We aim to visit you within 3 working days of receiving your call.
- We should get your problem fixed the first time we come out.
- We can send spare parts out to you within 2 working days of your call (as long as we have them in stock).

At the end of the day, we make sure the service we provide is to the same high standards as the products we make. With Mira you know you'll enjoy the best of both worlds.

If you need help or advice, or you want to report a fault with a Mira, please call us on 0844 571 5000

"It's gratifying to find a business that, even after a decade, is happy to look after its customers without counting every penny."

J. Harvey, Somerset

"Just to thank you for your superb service. In today's automated push-button options world, how refreshing to be able to speak to someone who will deal with the problem and see it through to completion."

D Hopton, W. Yorks

"What a total delight to be dealt with immediately I called, no answer machine, efficient and friendly from the first call to the problem being solved by the engineer within minutes of him coming to the house. I really should like to say a very big thank you for restoring my faith in true service."

M Crisp, W. Sussex

How to find help and advice online www.mirashowers.co.uk

Our website **www.mirashowers.co.uk** puts you in touch with lots of useful information and advice at the click of a mouse:

- Use our online tools to identify your water system or choose your ideal shower.
- Compare the benefits of our showers by using our 'compare and select' feature.
- Look up any technical terms you don't understand in our glossary or check our Frequently Asked Questions.
- Watch our handy installation videos.

You can also view or download our installation and user guides for all our products, as well as a technical brochure. Once you've bought a Mira you can also register your guarantee quickly and easy using the simple online form.

The perfect complement to a Mira Shower
Our range of contemporary style enclosures

Our range of contemporary style enclosures

Make every shower a real pleasure with a Mira enclosure. Our frameless doors and panels create a discreet, minimal styling while the 6mm toughened safety glass means there's no compromise on quality and safety.

- Over 18 style combinations to choose from – so you're bound to find the one for you.
- The range includes large walk-in designs to smaller corner areas for a restricted space.
- Every enclosure is simplicity itself to fit.

Strong, light and easy to fit - Mira Shower Trays

Mira Flight is a shower tray that will never let you down. Lighter, stronger and easier to fit, Flight also keeps its colour – so it always matches your bathroom décor. Mira Flight Low is also one of the lowest trays on the market, at just 40mm instead of the normal 90mm high.

Every white Mira Flight tray features innovative Biocote® anti-bacterial technology, which is incorporated in the manufacturing process. This unique finish reduces bacteria and mould in your tray by up to 99.9%. And unlike other protection, it will never wear off or wash away.

Find out more about our range of enclosures and trays – call us for a brochure now on **0844 571 0005**.
